To whom it may concern:

Snowlogic Inc. has been Trow's snow and ice maintenance provider for the past 16 years, during which time Snowlogic has provided time sensitive customer care.

Record setting snow accumulation and a parking space shortage have made the past several winter seasons exceptionally challenging. Snowlogic has been able to minimize any parking disruptions by creating a cost effective solution with the use of their specialized snow blowing equipment that is able to move large amounts of snow higher and into small spaces. This has eliminated the requirement of costly offsite haulage.

Dealing with a full season professional Landscape Company has made it easier for Trow staff to address the challenges that come with managing a large property. Our grounds have looked great for over a decade.

I have no problem to recommend Snowlogic for snow removal and landscape work.

If you have any questions or want to speak with me personally I can be contacted at 416-356-4947.

A handwritten signature in black ink that reads "James Lischkoff".
