

April 1, 2009

To whom it may concern:

Snow Logic Inc. has been responsible for the snow management programs at 5 locations where we are responsible for the property management. These locations vary in size, complexity and type. Snow Logic has been able to tailor their service to each locations specific need. Several of the facilities are high volume JIT manufacturing and logistics facilities that operate 24 hours per day, 7 days per week. These facilities require on call service for snow removal and salt application to paved and sidewalk areas. Snow Logic Inc. has been able to exceed our customer's expectations providing them on demand service 7 days per week. Using daily snow accumulation and salting reports Snow Logic is able to account for every pound of salt and every man hour used at each location. Snow Logic's combination of innovative snow removal ideas, high efficiency equipment and on-site salt dome are the reasons why we have chosen Snow Logic Inc. as our snow removal service provider

Sincerely yours:

A handwritten signature in blue ink, appearing to read "Pino Sasso". The signature is fluid and cursive, starting with a large loop and ending with a long horizontal stroke.
